

Building Performance Training is a sub-brand of Building Professionals that focuses on the design, development and delivery of green building training programs to serve both the new and retrofit residential and commercial building markets. Since 1983, Building Performance Training has educated thousands of installers across Canada and the United States.

Many of our programs focus on actual “on-site” workers. By maximizing their abilities we hope to ensure the proper installation and reliable operation of a building’s systems. However, we also have experience training site supervisors, estimators, foremen, architects, building officials and inspectors.

Our holistic approach to training uses innovative methods and techniques and helps every individual in each of our programs attain the skills necessary to work successfully in the industry. Whether you need an 8-hour new technology workshop or a comprehensive 8-month program, Building Performance Training provides a full service option for all your training needs.

## Looking for curriculum?

Building Professionals has just  
what you’re looking for!

Take advantage of our classroom-ready  
complete educational program today!

## GREEN RESIDENTIAL RETROFIT TECHNICIAN (GRRT) TRAINING

# the process

## 1. Sign a confidentiality agreement

Be secure in the knowledge that your interests are protected, and our curriculum is only made available to reputable organizations. The confidentiality agreement is our assurance that we are providing quality product.

## 2. Review course materials

Receive and review course materials in depth to determine if our course meets the needs of your students. We provide copies of our course manuals for review, and will work with you in every aspect of making sure this course meets your needs.

## 3. Choose method to set up course

- Pay a yearly licensing fee for course materials and Train the Trainer sessions.
- Pay per student that enrolls in the course, without a licensing fee or Train the Trainer session.

We provide a flexible arrangement so you can determine what will work best for you.

## 4. Sign the licensing contract

Once all parties are satisfied, sign the licensing agreement and begin advertising your course!

## 5. 'Train The Trainer' session

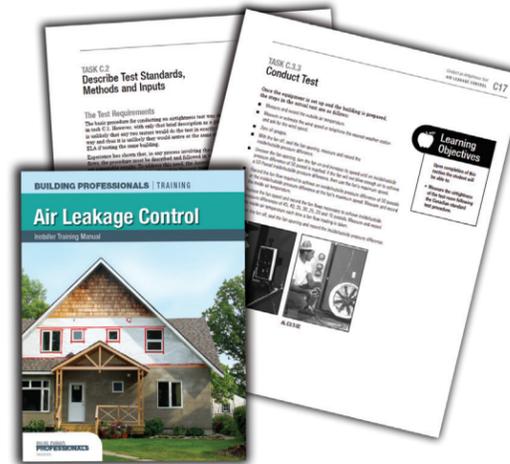

We will provide a seasoned, experienced instructor to work with your organization and ensure your instructors have the support they need to succeed when teaching our curriculum.

## 6. Start training!

# GRRT course materials

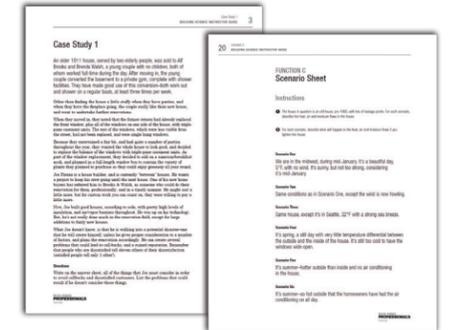

## Installer Manual

Detailed, step-by-step student reference manuals designed for use as a reference tool in the classroom and on the job site, with performance checklists, clear learning objectives, high quality images and concise instruction.

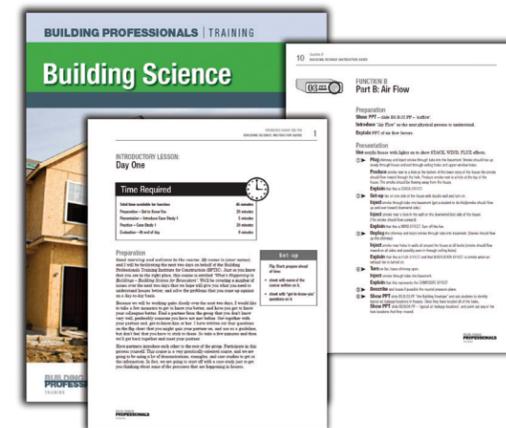

## Practical Reviews

Each function of the manuals include opportunities for increased learning and reinforcement of knowledge, with case studies, performance checklists, learning tools and knowledge reviews.

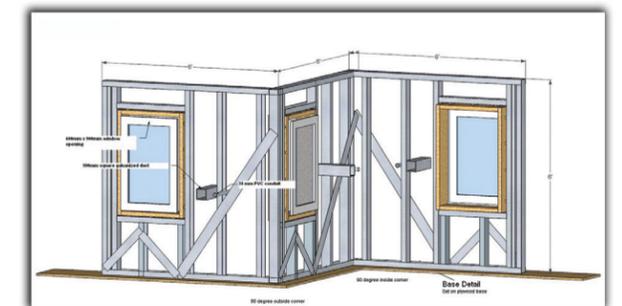

## Instructor Manual

Comprehensive instructor guide with proven four-step lesson plans and easy to understand format for instructors. Based on the principles of adult education, this guide will help you help students to succeed and prepare for work in the field.

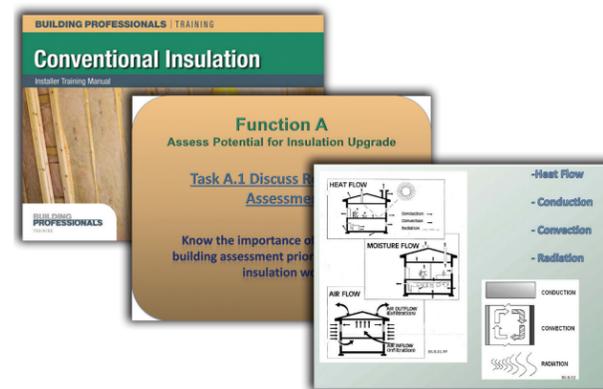

## Details and drawings for classroom mockups

Instructors are provided with comprehensive lists of equipment and design for creating a successful hands-on environment, from detailed drawings to tools and equipment lists. Each facet of the hands-on has been meticulously designed to create an optimal learning environment.

## Visual Teaching Aids

Customizable power point presentations that can be adapted to any teaching environment. Slides are referenced throughout the instructor guide for visual representation that will reinforce learning and supplement all aspects of the course content.

## Technical Support

Are you an Instructor with a question? Are you stumped by a classroom debate? Our technical advisors are available to support you with decades of building science and green industry education under their belts. We are here to help.
