

Sprayed Polyurethane Foam

SPF is the most efficient and cost effective insulation available, eliminating air infiltration, blocking moisture and reducing HVAC costs.

This training provides step-by-step instruction to safely, effectively insulate a building using SPF, providing information from how to select the right materials to best application techniques.

In this course, you will learn:

- Building Science
- Building codes & standards
- Health & safety
- Environmental conditions
- Material selection
- Equipment
- Substrate preparation
- Application methodology
- Quality control
- Storage and Maintenance
- Job Management

This training will prepare attendees who are seeking certification with ABAA, NABA, CUFCA or BP.

SPF Installer: 2-day course

This course is a condensed 2-day program that provides experienced installers with the knowledge to install Sprayed Polyurethane Foam Insulation.

The modules taken in this program are:

- Building Science
- Health & Safety
- Codes & Standards
- Substrate Preparation
- Application Technology
- Air Barrier Requirements
- Troubleshooting
- Quality Control
- Job Site Management

Individuals receive a student site reference manual that is theirs to keep and use on the job site.

SPF as an Air Barrier: 3-day course

This course is a 3-day program that provides experienced installers with the knowledge to install Sprayed Polyurethane Foam and Fluid Applied Insulation.

The modules taken in this program are:

- Building Science
- Health & Safety
- Codes & Standards
- Substrate Preparation
- Application Technology
- Air Barrier Requirements
- Troubleshooting
- Quality Control
- Job Site Management
- Installer Ethics and Responsibilities
- Plans & Specifications
- Material Selection and Properties
- Continuity and Compatibility of Components

Individuals receive a student site reference manual that is theirs to keep and use on the job site.

Outline For All Courses:

Codes & Standards	Substrate Preparation	Storage & Handling
Health & Safety	Application Methodology	Maintenance
Site Equipment	Air Barrier Requirements	Isolation & Ventilation
Fire Protection	Thermal Barrier Requirements	Drum Decontamination
Site Isolation	Heating & Hording	Spill Handling
Environmental Conditions	Troubleshooting	Installer Ethics
Material Selection	Quality Control	

Comprehensive SPF Installer: 5-day course

This course is a comprehensive 5-day program designed to give individuals the skills required to install Sprayed Polyurethane Foam Insulation. In addition to this, the training program provides the necessary health & safety training and product accessories needed to work in both commercial and residential construction.

This system is broken down into the following:

- Equipment - 3 days
- Building Science - 1 day
- Hands-On - 1 day

Individuals receive a student site reference manual that is theirs to keep and use on the job site.

Elite SPF Installer: 10-day program

This course is an intensive 10-day program designed to give individuals the skills required to install Sprayed Polyurethane Foam Insulation. In addition to this, the training program provides the necessary health & safety training and product accessories needed to work in both commercial and residential construction.

This system is broken down into the following:

- Health & Safety - 2 days
- Building Science - 3 days
- Equipment - 3 days
- Hands-On - 2 days

Individuals receive a student site reference manual that is theirs to keep and use on the job site.

Why Invest in Training?

Training is becoming a solution, an investment in the future, and the way to succeed. Surveys from contractors highlight what the major benefits are:

- Reduced call-backs
- Increased Productivity of Installers
- Accurate Estimating
- Marketing Advantage: instills confidence

The benefits and value of training outweigh the cost: the small investment you make in training can be recovered in a very short time, not to mention that training can be tax deductible.

Sprayed Polyurethane Foam Training

Training Packages - Please check off your training program choice(s):

- ☐ Sprayed Polyurethane Foam Installer – 2 day program
- ☐ Sprayed Polyurethane Foam Installer – SPF as an Air Barrier – 3 day program
- ☐ Sprayed Polyurethane Foam Installer – Comprehensive SPF Installer – 5 day program
- ☐ Sprayed Polyurethane Foam Installer – Elite SPF Installer – 10 day program

****All courses are designed to prepare attendees who are applying for certification with ABAA, NABA, CUFCA, BP****
